DNA

With **more than 60 years' experience** manufacturing adhesives, Productos Colcar has huge expertise manufacturing **hotmelt adhesives**.

Beginning in 1955, Productos Colcar has grown from a small traditional business, to become a European benchmark manufacturer.

We also work every day to obtain recognition in the sectors where we are present, based on our values of quality and service, and maintaining a leadership policy that allows us to continue expanding globally.

“Continuous Improvement

Francisco Remola · CEO

ECOLOGY

We have a wide range of Hotmelt adhesives for many sectors such as foam industry, dedicated especially to manufacture mattresses and sofas, to food industry, labelling, PET, synthetic and natural cork, and going through wide range of boxes, displays and even footwear applications.

We are currently **exporting almost half of our turnover**, and keep growing it. This is the reason that forces us to have a vision of

future, complying with a large number of environmental regulations and certifications.

Today we are recycling 99% of our products and are proud to contribute our knowledge to our customers for the development of **eco-friendly products**, for a greater sustainability.

“We recycle 99%
of the solid product

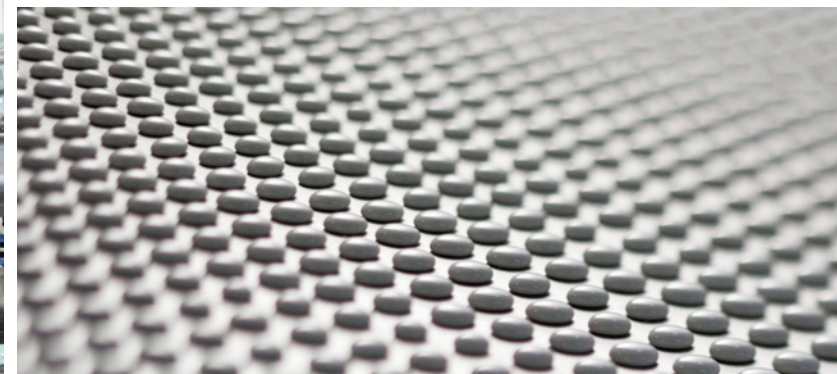

Pascual Martín · R&D Department

R&D

We are convinced of the importance that our R&D activity represents satisfied customers.

In our R&D department, we spend more than **80% of our time developing new formulas** and improving or adapting existing ones, and continuously testing new technologies, until we produce **a product tailored to our clients' needs.**

Our commitment does not end in the manufacturing process, but we expand it by performing an intensive **quality control** to ensure that our developments work and meet perfectly the agreed expectations

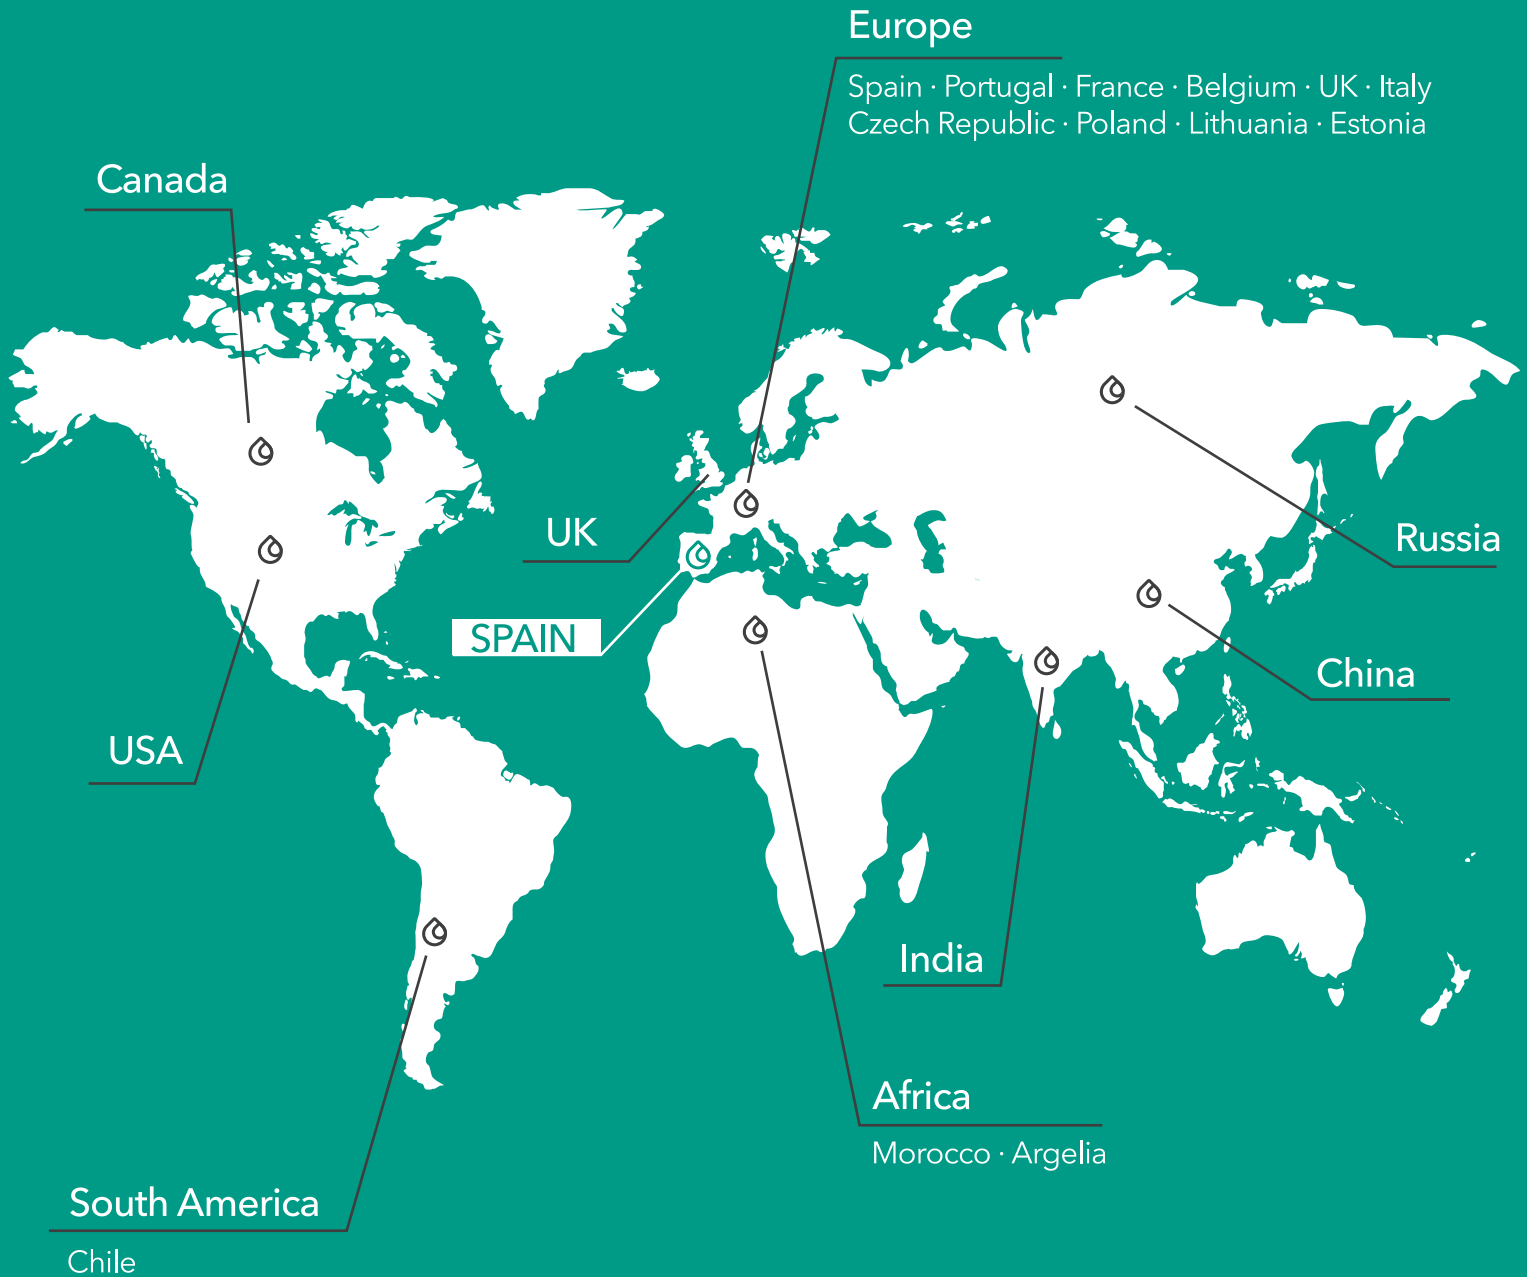

“Personalized Service with
customized adhesives

David Remola · General Director

Global presence with local service
